

Build. Learn. Innovate.

Where Students Become Inventors.

crabstertech.in

WHAT?

- 45+ Real world Projects
- 38 Components
- Access to Tutorials
- Free Guide
- Stickers

Why?

EZCircuit helps students learn electronics by building real circuits, turning classroom theory into hands-on innovation and inspiring the next generation of engineers.

WHO?

- School students
- College students
- School STEM Labs
- Robotics Workshops
- Hobbyists

About EZCircuit

EZCircuit is an all-in-one beginner-friendly electronics kit that designed to makes learning circuits simple, smart, and fun. Whether you're a student, hobbyist, or curious maker, this kit helps you build real projects and understand the basics of electronics hands-on.

Why Choose EZCircuit?

- ✓ Beginner-Friendly – Tutorials and Booklet
- ✓ Hands-On Learning – Build while you learn
- ✓ Smart & Organized – Components carefully selected for maximum learning
- ✓ Future-Ready – Strong foundation for IoT, Embedded and Electronics

5 Unique Projects:

- Smart Street Light (Intermediate Embedded)**
 - Lights automatically glow only when it's dark and someone passes by.
- Ultrasonic Blind Stick (Intermediate Embedded)**
 - A walking stick project that vibrates or beeps when obstacles are near.
- IoT Smart Irrigation System (Basic IoT)**
- Monitor soil moisture and control watering from your mobile.**
- Multi-Sensor Dashboard (Advanced IoT + Embedded)**
 - Collect data from multiple sensors (temperature, flame, light, etc.) and
- 555 Tone Generator (Analog/Electronics)**

What's Inside?

S.No	Component	Description	Quantity
1	ESP32 Dev Board	Microcontroller with Wi-Fi/Bluetooth	1
2	LED	Generic Green LED	5
3	10K Resistor	Standard resistor	5
4	100K Resistor	Standard resistor	5
5	10K Resistor	Standard resistor	5
6	100K Resistor	Standard resistor	5
7	10K	Light dependent resistor	1
8	DS18B20	Temperature & humidity sensor	1
9	Flame Sensor	Flaming gas sensor	1
10	IR Sensor Module	Obstacle sensor module	1
11	Flame Sensor	IR flame detection sensor	1
12	Relay	Active Relay 5V	1
13	Servo Motor (SG90)	Mini servo motor	1
14	Relay Module (5 Channels)	5 relay module	1
15	HC-SR04	Ultrasonic distance sensor	1
16	IR Sensor (HC-SR50)	Motion sensor	1
17	Vibration Sensor (SW-420)	Shock/Vibration sensor	1
18	Arduino	Arduino Uno R3	1
19	Arduino	Arduino Uno R3	1
20	Arduino	Arduino Uno R3	1
21	Arduino	Arduino Uno R3	1
22	Arduino	Arduino Uno R3	1
23	Arduino	Arduino Uno R3	1
24	Arduino	Arduino Uno R3	1
25	Arduino	Arduino Uno R3	1
26	Arduino	Arduino Uno R3	1
27	Arduino	Arduino Uno R3	1
28	Arduino	Arduino Uno R3	1
29	Arduino	Arduino Uno R3	1
30	Arduino	Arduino Uno R3	1
31	Arduino	Arduino Uno R3	1
32	Arduino	Arduino Uno R3	1
33	Arduino	Arduino Uno R3	1
34	Arduino	Arduino Uno R3	1
35	Arduino	Arduino Uno R3	1
36	Arduino	Arduino Uno R3	1
37	Arduino	Arduino Uno R3	1
38	Arduino	Arduino Uno R3	1
39	Arduino	Arduino Uno R3	1
40	Arduino	Arduino Uno R3	1
41	Arduino	Arduino Uno R3	1
42	Arduino	Arduino Uno R3	1
43	Arduino	Arduino Uno R3	1
44	Arduino	Arduino Uno R3	1
45	Arduino	Arduino Uno R3	1
46	Arduino	Arduino Uno R3	1
47	Arduino	Arduino Uno R3	1
48	Arduino	Arduino Uno R3	1
49	Arduino	Arduino Uno R3	1
50	Arduino	Arduino Uno R3	1

WHY?

- Beginner Friendly
- Step-by-Step Projects
- Designed for Practical Learning

Learn **Electronics** Made Easy

Unlock your potential with EZCircuit, the all-in-one electronics kit designed to take you from novice to inventor.

Rating

"I recently started learning IoT with the help of EZCircuit, and it has greatly expanded my knowledge and exploration in this field. I truly appreciate the effort behind this initiative and would encourage Sasi and the team to continue creating more resources like this. Such tools make learning practical, engaging, and imp "

Notes

```
// Simple ESP32 LED Blink

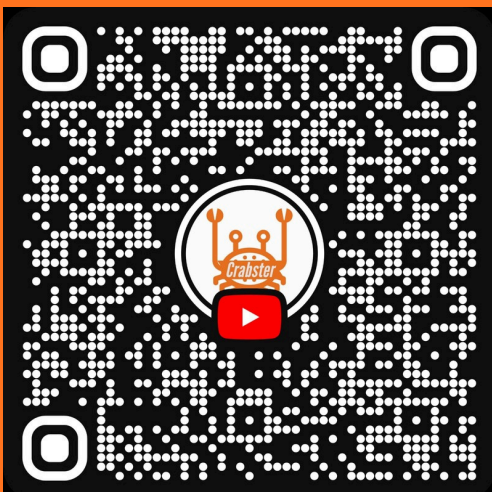

const int ledPin = 2; // GPIO where LED is connected

void setup() {
  pinMode(ledPin, OUTPUT); // Set pin as output
}

void loop() {
  digitalWrite(ledPin, HIGH); // LED ON
  delay(1000);                // Wait 1 second

  digitalWrite(ledPin, LOW); // LED OFF
```
